HOW TO DO

Proff Woodcare Proff Soap is a soft natural product used for cleaning of commercial floors. Proff Soap has a dual function: it cleans the floor and leaves an invisible nourishing coat on the floor protecting against fluids and dirt. The soap may be used for cleaning for cleaning of wood, vinyl, laminate and lacquered floors. Proff soap is available in natural.

Work Instruction:

1. Pour 125 ml of soap into 10 litre of lukewarm water. Use two buckets: 1 with Proff Soap solution and 1 with rinsing water. Use minimum quantity of soap water on the floor. Leave soap solution long enough on floor in order to dissolve dirt on floor. Remove dirty soap water from floor with mop and rinse mop in bucket with rinsing water. Or pour Proff Soap solution into floor cleaning machine in same ratio as described above.
2. Always wipe floor after removal of dirty soap water with hard soap wrung mop. Make sure that no puddles of water are left on the floor.
3. If the floor has been neglected and is extremely dirty, a floor machine with white pad may be used for dissolution of dirt. Removal of dirty water from floor and wiping with soap water is done as under point 2.

Disposal: Empty containers and product residue disposed of according to regional rules and regulations.

Consumption: 1 litre to 300 – 350m²
